Portfolio – pruthuvi-kodagoda.vercel.app

Profile Summary

Self-motivated software engineering undergraduate with hands-on experience in full-stack development and Agile SDLC environments. Quick to learn and adapt to new languages, tools, and frameworks, with a passion for problem-solving and teamwork. Committed to exploring innovative solutions through research and emerging technologies.

Work Experience

Software Engineer Intern

Jan 2024 – Aug 2024

Xeptagon (Pvt) Ltd, Colombo, Sri Lanka

- Contributed to 2+ full stack development projects focused on carbon credit management systems supporting global climate finance initiatives
- Independently developed a Leave Management System using the SPFx framework to improve HR processes
- Integrated and maintained RESTful APIs for smooth frontend-backend communication
- Collaborated effectively in cross-functional teams while adhering to confidentiality policies
- Worked with 10+ modern technologies and tools, including React as the frontend framework, .NET 8 as the backend framework, EF Core, PostgreSQL, SPFx, Docker, Jira, and Figma

Education

BSc (Hons) Information Technology

Jun 2021 – Present

University of Moratuwa, Sri Lanka

Major: Full Stack Engineer | Minor: Machine Learning Engineer

Current GPA – **3.52** (Up to Level 4 Semester 1)

- | | |
|-------------------|-------------------|
| • L1S1 SGPA : 3.7 | • L1S2 SGPA : 3.4 |
| • L2S1 SGPA : 3.8 | • L2S2 SGPA : 3.6 |
| • L3S1 SGPA : 3.3 | • L4S1 SGPA : 3.5 |

Publications

Use of Artificial Intelligence in the Automobile Industry

Apr 2025

Authors : K. G. A. P Dilshan & K. A. D. T Kulawansa

Accepted and presented at the 9th International Conference on Information and Communication Technology for Intelligent Systems (ICTIS 2025), held on 6th April 2025 in Bangkok, Thailand. This paper examined AI in the automobile industry, highlighted current challenges, and proposed future directions with practical, ethical, security, and sustainability insights.

Core Competencies

- | | |
|---|---|
| • C#, JavaScript, TypeScript, Java, Python, C | • MSSQL, MySQL, PostgreSQL |
| • React, Angular, SCSS, HTML, CSS, SPFx | • Figma, Bootstrap, Material UI, Ant Design |
| • .NET Core, NodeJS, RESTful APIs | • Docker, AWS, CI/CD |
| • GitHub, Jira, Agile | • VSCode, Visual Studio, NetBeans, IntelliJ |

Projects

EliteAuto - Online Car Rental System

May 2025 – Present

Full Stack Project

- Designed and developing a full-stack car rental management system with Angular frontend and .NET Web Api backend
- Built RESTful API for car rental management with secure user registration, role-based access, and rental workflows
- Implemented secure JWT authentication and authorization to manage admin/user access and protect endpoints
- Ensured data integrity and scalability using MSSQL (code-first EF Core migrations) and Dockerized containers for consistent deployment
- Role: Full Stack Developer | Technologies: Angular, .NET 8, MSSQL, Entity Framework Core, JWT, Docker

Generating Basic English Cooking Performance Guide from Cooking Video Demonstration

Aug 2024 – Aug 2025

Final Year Research Project

- Developed a fully automated system to identify specific cooking actions by detecting tools and ingredients used in each step of cooking videos
- Generated clear and concise English instructions from the recognized actions, tools, and ingredients
- Selected best images for guides by assessing sharpness (Laplacian variance) and contrast (pixel intensity deviation)
- Matched the best detailed images aligned with each instruction to create comprehensive stepwise visual guides
- Role: ML Developer | Technologies: Python, YOLOv8, Roboflow, OpenCV, Colab

Wine Quality Prediction System

Nov 2024 – Dec 2024

Machine Learning Project

- Developed a machine learning model to predict wine quality scores (1–10) using physicochemical lab measurements and previous human sensory data
- Enabled objective, consistent quality predictions automating traditional sensory testing and supporting production decisions
- Performed preprocessing, feature engineering, and cross-validation, achieving 91.69% accuracy with Random Forest validated by test results and confusion matrix
- Role: ML Developer | Technologies: Python, Scikit-learn, Pandas, NumPy, Matplotlib, Colab

Procurement Workflow Management System

Jun 2022 – Jun 2023

Level 2 Software Project

- Led frontend development, delivering an intuitive UI with modern styling and seamless functionality
- Established and managed 15+ API integrations to ensure real-time data synchronization between frontend and backend
- Assisted in developing robust backend components, including database models, controllers, and services, with a focus on performance optimization
- Role: Full Stack Developer | Technologies: ReactJS, .NET 6, MSSQL, Entity Framework Core, Material UI
